

01/17

The Construction of Bahrain Liquefied Natural Gas (BLNG) Import terminal will commence in FEB 17, and located North East of Khalifa Bin Salman Port (KBSP). The works will include: construction of the Breakwater, dredging activities, and the ground piling works for the LNG jetty and associated Platform.

Offshore Construction works will start first week of FEB 17 and last up to FEB 19. During this period, marine transportation activities will also take place between KBSP and BLNG Terminal.

All mariners are requested to note the following:

- Construction activities will commence with immediate effect and is expected to be completed by the end of 2018.
- Subject to weather condition, operations will be carried out round the clock (24 hours).
- A NO-GO- ZONE area is set up for the construction activities, where authorized boats/vessels are permitted to enter only.

The area will be marked with yellow buoys and yellow flashing lights, located at the following positions:

P1 26° 14.328 N 050° 44.751 E
P2 26° 14.412 N 050° 45.276 E
P3 26° 13.903 N 050° 45.293 E
P4 26° 13.456 N 050° 44.531 E
P5 26° 14.052 N 050° 44.413 E

Mariners are requested to exercise extreme caution when transiting the area, and shall pass more than 1000 meters from the work area marker buoys on site.

Mariners also requested to maintain close communication with Bahrain Port Control (VTS) on VHF channel 74.
