

ELEVATION

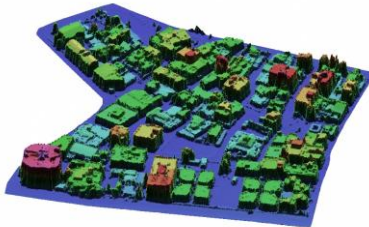

Elevation describes the different heights of the land terrain surface. SLRB use of GPS and multiple modern technologies such as LiDAR and aerial imagery to generate various elevation products.

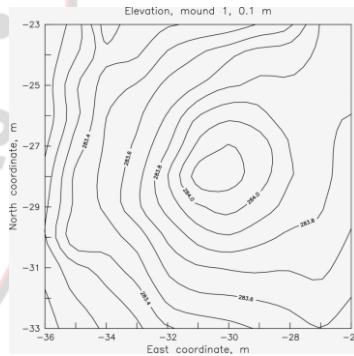

DTM
Digital terrain model

In particular Digital Surface Model (DSM), Digital Terrain Model (DTM) and digital contour lines are being produced at various intervals and different output formats.

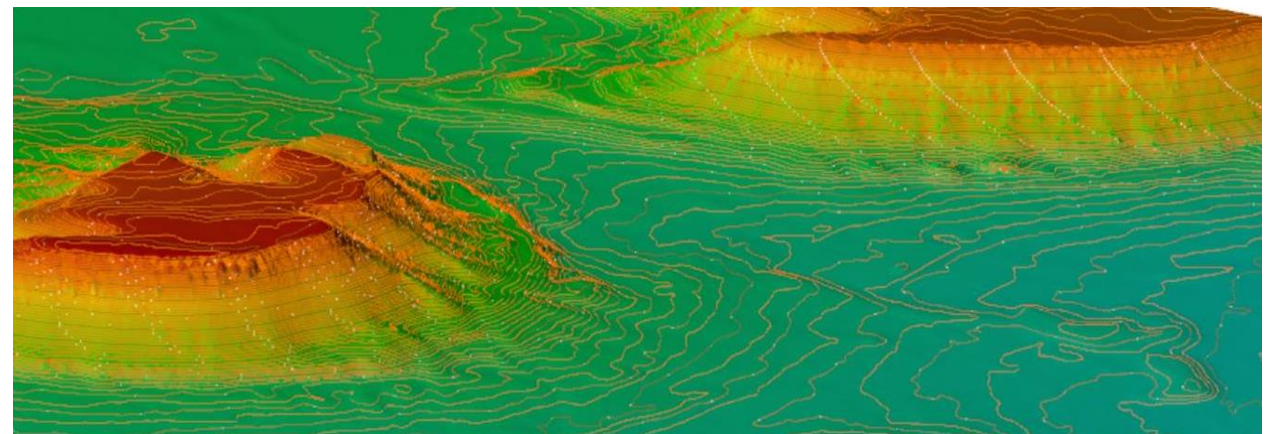

DSM
Digital surface model

Contours
Various height intervals

Product	Intervals	Format
DTM	1m	Digital Point Cloud
	10m	
	25m	
	50m	
	Various	
DSM	On Demand	Digital Point Cloud
Contours	1m	Digital Hardcopy
	2m	
	5m	
	Various
